Our tradition:

Competence since 1871

We have supplied generations of customers worldwide with pumps, valves, automation products and services. A company with that kind of experience knows that success is a process based on a stream of innovations. A process made possible by a close working alliance between developer and user, between production and practice.

Partners achieve more together.

We do everything possible to ensure that our customers always have access to the ideal product and system solution. KSB is a loyal partner:

- Over 147 years' experience
- Present in more than 100 countries
- More than 15,000 employees
- More than 170 service centres worldwide
- Approximately 3,000 service specialists

Smart services for maximum availability and efficiency

As a leading supplier of pumps and valves, we attach great importance to providing you with a comprehensive service of the highest quality. In fact, we believe it's so important that we even gave it a special name: KSB SupremeServ.

KSB SupremeServ is on hand to support you with classic and digital service and spare parts solutions over the entire product life cycle. Whether it's a KSB product, non-KSB product or other rotating equipment, you'll benefit from the reliable and sustainable operation of your system.

Applications:

- Water and Waste Water
- Energy
- Mining

- Industry
- Building Services

Wherever and whenever you need us, we're there for you – worldwide. www.ksb.com

KSB SupremeServ

Our mission:

Certified quality assurance

First-class products and excellent service take top priority at KSB. To maintain this level of excellence, we have developed a modern quality management system with globally applicable guidelines. It is based on the Business Excellence model of the European Foundation for Quality Management, which already ensures improved quality management Europewide.

Our guidelines define uniform quality for all KSB locations and have helped us to optimise our manufacturing processes. The results are shorter delivery times and global availability of our products. These guidelines govern the way we act so comprehensively that even the competence of our consulting and the good value for money we offer are clearly stipulated. Like the 'Made in Germany' quality seal, we introduced internal certification as a sign of the highest quality: 'Made by KSB'.

Our five key goals:

- Maximum customer satisfaction: We do everything to fulfil our customers' wishes on time and in full.
- Fostering quality awareness: We put our quality commitment into daily practice – from executives to employees, whose qualifications and competence we foster through continuing training.
- Prevention rather than cure: We systematically analyse errors and prevent the causes.
- Improvement in quality: We continually optimise our processes in order to work more efficiently.
- Involvement of suppliers: We attach great importance to working together fairly and openly to achieve our shared goals.

As a signatory to the United Nations Global Compact, KSB is committed to endorsing the ten principles of the international community in the areas of human rights, labour standards, environmental protection and anticorruption.

Industry 4.0: we have experience with the future

Digital networking of production systems is one of the key challenges ahead. An expert in engineering with long-standing experience in developing Industry 4.0 solutions, KSB is your ideal partner to achieve:

- Resource efficiency and optimised use of materials
- Availability and operating reliability
- Flexibility through short-term reconfigurability
- Reduction of time to market

Increase your system's productivity already today with KSB's smart products and services: Use our intelligent technologies designed to communicate, such as PumpDrive and PumpMeter, to lay a foundation for your smart factory. Find out more about our future-driven solutions at www.ksb.com/industry40

FluidFuture®: the energy-saving concept for your system

Many systems do run reliably but they also use a lot more power than necessary. The solution: efficiency optimisation with FluidFuture® in four steps. We look at the entire hydraulic system to achieve maximum energy efficiency throughout the life cycle. The optimisation costs will pay for themselves within a short period through the high energy savings that can be made.

The process and its four steps are clearly defined – based on extensive expertise and experience. This systematic and targeted approach ensures maximum savings at minimum costs. Perfectly matching the hydraulic system, drive and automation products as well as the piping dimensions can result in savings of up to 60 %.

We reduce the operating costs of your system by combining our expert knowledge with smart products and services. This is our joint contribution towards an energy-efficient future.

More on FluidFuture®: www.ksb.com/fluidfuture

General Information

ErP	ErP regulations stipulating new, stricter minimum efficiency values became effective at the start of 2015. Since then, only pumps and motors which satisfy the energy efficiency requirements of the European Union's ErP Directive may be placed on the market. For KSB's products this is child's play. They are so efficient, many actually exceed the values required since 2015 – some even those applicable from 2017 as per the ErP regulations.
Regional products	Not all depicted products are available for sale in every country. Products only available in individual regions are indicated accordingly. Please contact your sales representative for details.
Trademark rights	All trademarks or company logos shown in the catalogue are protected by trademark rights owned by KSB SE & Co. KGaA and/or a KSB Group company. The absence of the "@" symbol should not be interpreted to mean that the term is not a registered trademark.
Product illustrations	The products illustrated as examples may include options and accessories incurring a surcharge. Subject to modifications due to technical enhancements.
Product information	For information as per chemicals Regulation (EC) No 1907/2006 (REACH), see www.ksb.com/reach.

Drive, variable speed system and monitoring

KSB SuPremE

Number of pumps U [V]

PumpDrive / PumpDrive R only

≤ 1 Description

Power supply via IEC-compatible sensorless magnetless synchronous reluctance motor (exception: motor sizes 0.55 kW / 0.75 kW with 1500 rpm are designed with permanent magnets) of efficiency class IE4 / IE5 (super/ultra premium efficiency) to IEC TS 60034-30-2:2016 for operation on a KSB PumpDrive 2, PumpDrive 2 Eco or PumpDrive R variable speed system. Suitable for connection to three-phase 380 - 480 V power supply (via PumpDrive). The motor mounting points comply with EN 50347 specifications to ensure compatibility with standardised IEC frame motor applications and full interchangeability with IE2 or IE3 standardised asynchronous motors. Envelope dimensions lie within the limits for IE2 / IE3 motors as recommended in DIN V 42673 (07-2011). The motor is controlled without rotor position sensors. The efficiency of the motor also exceeds 95 percent of nominal efficiency when the motor runs at 25 percent of its nominal power on a quadratic torque-speed curve. The motor is magnetless which means that socalled rare earths are not used in production. Drive production is thus sustainable and environmentally friendly.

For use with dry-installed variable speed pumps which can be driven by standardised foot-mounted and/or flange-mounted motors.

http://shop.ksb.com/catalog/k0/en/product/ES000866

KSB UMA-S

Number of pumps U [V]

Other mains voltages on request

Permanent-magnet submersible synchronous motor, for operation on a KSB PumpDrive R variable speed system. NEMA connections and identical outside diameters ensure full interchangeability with comparable 6-inch or 8-inch asynchronous motors. The motor is controlled without rotor position sensors. The motor efficiency is 5 - 12 % above that of asynchronous motors. Given the design and functionality the use of permanent magnets is essential.

Exclusively for submersible borehole pumps in the range of 4 to 150 kW.

http://shop.ksb.com/catalog/k0/en/product/ES000003

PumpDrive 2 / PumpDrive 2 Eco

Number of pumps P [kW] U [V] Frequency inverter

≤6 Description 3~380 - 480

1 per motor

55 Modular self-cooling frequency inverter that enables continuously variable speed control of asynchronous and synchronous reluctance motors by means of analog standard signals, a field bus or the control panel. As PumpDrive is self-cooling, it can be mounted on a motor, on the wall or in a control cabinet. Up to six pumps can be controlled without needing an additional controller.

Applications

Air-conditioning systems, heat generation, heat distribution, water supply systems, water extraction, water treatment, water distribution, water transport, refrigeration, cooling distribution, heat generation, heat distribution, fluid transport, cooling lubricant distribution, industrial water supply, tank drainage, waste water transport

http://shop.ksb.com/catalog/k0/en/product/ES000911

PumpDrive R

Number of pumps P [kW] U [V] Frequency inverter

1 per motor

55 Frequency inverter for wall mounting or cabinet mounting. For variable speed 3~380 - 480 control or other control functions of asynchronous motors, synchronous reluctance motors like KSB SuPremE or permanent magnet synchronous motors. PumpDrive R extends the power range of KSB PumpDrive up to a rated power of 110 kW as standard or up to 1.4 MW (on request).

Air-conditioning systems, heat generation, heat distribution, water supply systems, water extraction, water treatment, water distribution, water transport, refrigeration, cooling distribution, heat generation, heat distribution, fluid transport, cooling lubricant distribution, industrial water supply, tank drainage, waste water transport

29 Automation

PumpMeter

Number of pumps U [V DC]

≤ 1 Description

24 Device for monitoring the operation of one pump. It is an intelligent pressure transmitter for pumps, with on-site display of measured values and operating data. It records the load profile of the pump in order to indicate any potential for optimising energy efficiency and availability. The device comprises two pressure sensors and a display unit. PumpMeter is supplied completely assembled and parameterised for the pump it is used with. It is ready for operation as soon as the M12 plug connector is plugged in.

Applications

Air-conditioning systems, cooling circuits, cooling lubricant distribution, heating systems, water treatment plants, water supply systems, water distribution systems, water transport systems, water extraction systems

KSB Guard

≤ 20 (per gateway) Description Number of pumps U [V AC] 110 - 240 (gateway) 2 x 1,5 (sensor) U [V DC]

System for monitoring the condition of pumps: Sensors on the pump record vibration and temperature data, which is processed in the KSB Cloud. Information on the pump's condition can then be accessed using the KSB Guard app or through the web portal. Easy to retrofit on pumps during operation.

Applications

For monitoring dry-installed pumps, optimising maintenance and improving system availability

Drinking water circulators, fixed speed

Compacta

DN Q [m³/h] H [m] T [°C]

Data for 50 Hz operation

80 - 100 Description

≤ 140 $\leq 24,5$ ≤ +40

Floodable single-pump sewage lifting unit or dual-pump sewage lifting unit for automatic disposal of waste water and faeces in buildings and building sections below the flood level.

Applications

Basement flats, bars, basement party rooms and saunas, cinemas and theatres, department stores and hospitals, hotels, restaurants, schools, other public buildings, industrial facilities, underground train stations or for joint sewage disposal from rows of houses.

CK 800 Pump Station

Q [m³/h] H [m] T [°C]

Data for 50 Hz operation

32 - 50 Description

≤ 22 Single-pump station / dual-pump station as ready-to-connect package system, ≤ 49 with PE-LLD (polyethylene) collecting tank for buried installation. Equipped with either one or two submersible waste water pumps of type Amarex N S

(explosion-proof or non-explosion-proof) or Ama-Porter (non-explosionproof). Tank design to DIN 1986-100 and EN 752/EN 476.

Applications

Drainage of buildings and premises, waste water disposal, premises renovation, joint sewage disposal for multiple residential units, pumped

http://shop.ksb.com/catalog/k0/en/product/ES000778

CK 1000 Pump Station

DN Q [m³/h]H [m] T [°C]

Data for 50 Hz operation

50 - 65 Description

≤ 50 Single-pump station / dual-pump station as ready-to-connect package system,

with PE-LLD (polyethylene) collecting tank for buried installation. Equipped

with either one or two submersible waste water pumps of type Amarex N (explosion-proof or non-explosion-proof) or Ama-Porter (non-explosionproof). Tank design to DIN 1986-100 and EN 752/EN 476.

Applications

Drainage of buildings and premises, waste water disposal, premises renovation, joint sewage disposal for multiple residential units, pumped

http://shop.ksb.com/catalog/k0/en/product/ES000266

Ama-Porter CK Pump Station

DN Q [m³/h]H [m] T [°C]

Data for 50 Hz operation

50 - 65 Description

 \leq 40 Single-pump station / dual-pump station as ready-to-connect package system,

with PE-LLD (polyethylene) collecting tank for buried installation. Equipped ≤ 16 with either one or two submersible waste water pumps of type Ama-Porter

≤ +40 (non-explosion-proof). Tank design to DIN 1986-100 and EN 752/EN 476.

Applications

Drainage of buildings and premises, waste water disposal, premises renovation, joint sewage disposal for multiple residential units, pumped

http://shop.ksb.com/catalog/k0/en/product/ES000498

SRP

DN Q [m³/h]H [m] T [°C]

Data for 50 Hz operation Also available for 60 Hz

50 - 150 Description

 \leq 500 Single-pump station or dual-pump station as ready-to-connect package

system, with fibreglass collecting tank for buried installation ≤ 75

Applications

Premises renovation, disposal of domestic, municipal and industrial waste water, joint sewage disposal for multiple residential units

Control unit, LevelControl

http://shop.ksb.com/catalog/k0/en/product/ES000443

SRL

DN Q [m³/h]H [m] T [°C]

Data for 50 Hz operation

65 - 150 Description

≤ 500 Package pump station with tank made of glass fibre reinforced polyester, equipped with two dry-installed Sewabloc pumps with a rating of 2.2 to ≤ 55 30 kW, integrated valves and a control unit with frequency inverters. Pump

operation is adjusted in line with flow rate demand, thus minimising energy costs. This maintenance-friendly pump station prevents intermediate storage of waste water and the related odour nuisance.

Joint disposal of domestic, municipal and industrial waste water to the sewer system / waste water treatment plant

SRS

DN Q [m³/h] H [m] T [°C]

C]

Data for 50 Hz operation

Also available for 60 Hz

50 - 65 Description

≤ 50 Package pump station with tank made of glass fibre reinforced polyester for underfloor installation and two submersible waste water pumps mounted on duckfoot bends, with two guide systems. Complete discharge line made of PVC with ball valves and ball check valves fitted in the tank.

Applications

Stormwater disposal, grey water disposal, waste water disposal

LevelControl

Submersible motor pumps

Amarex

DN Q [m³/h]H [m] T [°C]

Data for 50 Hz operation Also available for 60 Hz

50 - 150 Description

 \leq 320 Vertical single-stage submersible motor pump for wet installation, with free-≤ 42 flow impeller (F-max) or open dual-vane impeller (D-max), stationary or transportable version. Single-stage, single-entry close-coupled pump sets which are not self-priming. ATEX-compliant version available.

Waste water transport, waste water management, drainage systems, waste water treatment plants, stormwater transport, recirculation, sludge treatment

http://shop.ksb.com/catalog/k0/en/product/ES000979

Amarex N

DN Q [m³/h]H [m] T [°C]

Data for 50 Hz operation Also available for 60 Hz

32 - 100 Description

≤ 190 Vertical single-stage submersible motor pump for wet installation, with cutter \leq 49 (S), free-flow impeller (F) or diagonal single-vane impeller (D), stationary or transportable version. Amarex N pumps are floodable, single-stage, singleentry close-coupled pump sets which are not self-priming. ATEX-compliant version available.

Pumping waste water, especially untreated waste water containing long fibres and solid substances, liquids containing gas or air, and raw, activated and digested sludge; dewatering and water extraction, drainage of rooms and areas at risk of flooding.

http://shop.ksb.com/catalog/k0/en/product/ES000507

Paper industry, cellulose industry, sugar industry, food industry, chemical industry, petrochemical industry, flue gas desulphurisation, industrial engineering, waste water transport

PumpDrive

Slurry pumps

WBC

≤ 16200 Description

≤ 80 Patented design with state-of-the-art hydraulic system and highly wear-≤ 32 resistant materials for high-pressure applications. The pump casing is designed to withstand maximum stresses, e.g. during pressure surges. ≥ -20 - ≤ +120

Applications

Ideal for the single-stage or multistage transport of ore and tailings and for dredging.

http://shop.ksb.com/catalog/k0/en/product/ES000227

LSA-S

Q [m³/h]H [m] p [bar] T [°C]

≤ 18000 Description

≥ -20 - ≤ +120

≤ 150 Premium design white cast iron pump for long service life handling severe ≤ 17 slurries. The maintenance-friendly single-wall construction and heavy section white cast iron wet end combined with the cartridge bearing assembly

provide maximum reliability, a long service life and ease of maintenance. Applications

Ore and tailings transport, cyclone feed, dredging (dry-installed or submerged operation) and industrial processes.

http://shop.ksb.com/catalog/k0/en/product/ES000220

LCC-M

Q [m³/h]H [m] p [bar] T [°C]

≤ 3200 Description

 \leq 90 The wetted pump end (casing, impeller and suction plate / liner) is made of ≤ 16 white cast iron. Design optimised to permit easy dismantling and reassembly for maintenance and inspections. ≤+120

Applications

Reliable pump for high heads and moderately corrosive slurries. Used in mine dewatering, ash and tailings transport and dredging.

LCC-R

Q [m³/h]H [m] p [bar] T [°C]

≤ 2560 Description

≤ 42 Interchangeable rubber-lined or part-metal design allows adaptation of ≤ 16 existing pumps to new applications by simply exchanging the pump wet end.

Applications ≤ +65

The pumps are suitable for moderate heads, fine particles and highly corrosive slurries.

http://shop.ksb.com/catalog/k0/en/product/ES000218

TBC

Q [m³/h]H [m] p [bar] T [°C]

≤ 18200 Description

≤ 90 Horizontal high-pressure end-suction centrifugal pump offering maximum ≤ 37 resistance to wear and ease of maintenance. The conventional single-wall design transfers stress loads from the wear plates to the casing covers in high-≥ -20 - ≤ +120 pressure applications. Pump components made of highly wear-resistant white cast iron.

Applications

High-head high-flow hydrotransport of tailings, dredged material, pipeline booster stations and other severe duties.

LCV

Q [m³/h]H [m] ≤ 38 p [bar]

≤ 2045 Description

Rugged vertical shaft submersible pump with casing, impeller and suction plate / liner made of white cast iron, bearing assembly located outside the fluid handled. Replaceable wetted parts made of white cast iron or natural rubber.

Applications

Particularly suitable for use in industrial processes and for transporting tailings in mines and pits.

http://shop.ksb.com/catalog/k0/en/product/ES000016

FGD

Q [m³/h] H [m] p [bar] T [°C]

T [°C]

≤ 23000 Description ≤ 10

≥ -20 - ≤ +120

≤+120

 \leq 30 High-flow / low-head white cast iron pump with single-wall casing and highefficiency impeller. Single-piece suction cover with integrated mounting

Applications

Flue gas desulpurisation systems and process circuits

http://shop.ksb.com/catalog/k0/en/product/ES000231

MHD

Q [m³/h] H [m] p [bar] T [°C]

≤ 90000 Description

≥ -20 - ≤ +120

≤ 13

 \leq 115 Horizontal volute casing pump for high-volume hydrotransport of solids. For pumping slurries of large and very large particle sizes with a very good suction behaviour and high efficiency. Pump components made of white cast

Applications

Ideal for pipeline pressure booster stations and severe mining duties. Highly suitable for loading and unloading duties on (cutter) suction dredgers.

http://shop.ksb.com/catalog/k0/en/product/ES000224

LHD

Q [m³/h]H [m] p [bar] T [°C]

≥ -20 - ≤ +120

≤ 30000 Description

≤ 105 Horizontal volute casing pump for high-volume hydrotransport of solids. For ≤ 15 pumping slurries of large and very large particle sizes with a very good suction behaviour and high efficiency. Used in low-pressure applications. Pump components made of white cast iron.

Applications

Ideal for handling sand and gravel, on dredgers for land reclamation and as booster pumps.

http://shop.ksb.com/catalog/k0/en/product/ES000223

MDX

Q [m³/h] H [m] p [bar] T [°C]

≤ 14000 Description

 \geq -20 - \leq +120

≤ 16

 \leq 90 Pump designed with the latest technology from GIW. Superior wear properties and extremely long service life handling aggressive slurries.

Applications

Designed for SAG and ball mill discharge duties, cyclone feed, screen feed and other ore mining and treatment processes.

ZW

Q [m³/h]
H [m]
p [bar]
T [°C]

 \leq 35 Rugged vertical shaft submersible pump with casing, impeller and suction ≤ 10
≤ 10 cover made of white cast iron, top and bottom impeller inlet. Long-life bearings not exposed to fluid handled. Replaceable wetted components.

Applications

Particularly suitable for pumping abrasive slurries, dewatering, floor clean-up and process applications.

http://shop.ksb.com/catalog/k0/en/product/ES000852

HVF

≤ 50 The pump provides continuous operation without shutdown or operator intervention. The new hydraulic design removes air from the impeller eye ≤+120

For use in all froth pumping applications in the mineral processing and industrial minerals industries.

Self-priming pumps

H_{qeo} [m]

Etaprime L

DN Q [m³/h] H [m] ≤ 85 p [bar] ≤ 10 >-30 - \le +90 T [°C]

Data for 50 Hz operation Also available for 60 Hz

25 - 125 Description

≤ 180 Horizontal self-priming volute casing pump, single-stage, with open multivane impeller, from size 40-40-140 with bearing bracket, in back pull-out design, ATEX-compliant version available.

Applications

Pumping clean, contaminated or aggressive fluids not containing abrasive substances and solids. For use in spray irrigation systems, service water systems, drainage, dewatering systems, fire-fighting systems, drawdown of groundwater levels, domestic water supply, air-conditioning systems, cooling circuits, swimming pools, water supply systems.

http://shop.ksb.com/catalog/k0/en/product/ES000120

Vitachrom

DN Q [m³/h]H [m] p [bar] T [°C]

50 - 125 Description > -30 - < +110

 \leq 340 Service-friendly non-self-priming single-stage hygienic close-coupled pump in ≤ 100 back pull-out design with magnetless KSB SuPremE motor of efficiency class IE4/IE5 and PumpDrive variable speed system. The pump features a semi-open impeller and electropolished surfaces. It is very easy to clean by CIP/SIP thanks to its almost complete lack of dead volume or narrow clearances. Its wetted components are made of 1.4404/1.4409 (AISI 316L/CF3M) stainless steel. Vitachrom is EHEDG-certified. All materials comply with FDA standards and EN 1935/2004. ATEX-compliant version available.

Applications

Hygienic handling of fluids in the food, beverage and pharmaceutical industries as well as in the chemical industry.

DN 25 - 200 Q [m³/h] H [m] < 200 p [bar] ≤ 20 T [°C] > -40 - < +180 Viscosity [cP] ≤ 200000

Data for 50 Hz operation Also available for 60 Hz Other ratings possible on request

Description

Sturdy rotary lobe pump in hygienic design, bi-directional operation possible, horizontal or vertical orientation of connections. Hygienic design, highly CIP/ SIP-compatible due to its almost complete lack of dead volume or narrow clearances. All wetted components made of 1.4404/1.4409 (AISI 316L/CF3M) stainless steel; various rotor types, shaft seals and process connections available. Installed as a pump set with gear unit and standardised motor. Vitalobe is EHEDG-certified. The pump elastomers comply with the FDA standards and EN 1935/2004. Accessories include a trolley, a heatable casing or casing cover and a pressure relief arrangement. An ATEX-compliant version

Hygienic and gentle handling of sensitive or high-viscosity fluids in the food, beverage and pharmaceutical industries, the chemical industry and general process engineering.
